Progress of works

The installation of new heating distribution pipes to the NCP car park is now complete including the connections to the existing risers.

These new pipes are now supplying heating to the blocks directly above this car park.

We have also progressed to the same level with the new heating distribution pipes within the Camden car park.

The water tank replacement above the Mexborough block is now complete with both new tanks having been commissioned and now supplying water to both the block and the boiler house.

We have started to back fill the excavations to installation of the underground heating distribution pipes between the boiler house and Warmsworth block.

Progress of works cont:

We are progressing with the installations of the new heating distribution pipes to the area in front of the Marr block and boiler house areas. And we should start installing the new heating pipes outside the front of Barnborough block within the next few days.

PLEASE BEWARE!

We would like to remind parents that during the works children are their responsibility and that fenced off areas are classed as building sites and not play areas.

All Apollo employees will have an Apollo photo identification card and should be wearing an Apollo high viz jacket with identification numbered on the back.

If you are unsure about a caller to your home you should ask them to wait outside and call any member of the project team.

Weekly information surgery

Please be reminded that every Tuesday at 10am at the site office the RLO and Site Manager will be available to answer any concerns/questions you may have about the work.
